# The space3000 Idea

The requirements for modern workspaces are changing. Creative work in flexible locations is getting more important and Whiteboards are a very important tool. But they're often heavy, inflexible and short-lived. **Our mission is to give users maximum freedom as to how and where they work creatively.** The space3000 boards are so modular and lightweight that frequent room and floor changes are just as possible as outdoor creative sessions.

**Designed with agile methods for agile methods:** space3000 is the result of the Design Thinking consulting agency *openmind*. We ourselves were dissatisfied with existing products. So we decided to develop our own solution, together with customers and partners, which **meets the requirements of modern and agile teamwork.**

We started in Berlin in 2018. We focus on local production, fair conditions and co-creation with our customers. Our boards are used in corporations and innovation agencies as well as in co-working spaces all around Germany.

# BigBoard

Whiteboard rethought: The BigBoard is designed for people who want to stay flexible in their work. It can be easily grabbed and carried into the adjoining room or even outside. **It can be used upright or crosswise.**

It adapts to your workflow: Leaned against a tree, stuck in our frame or spontaneously hung on the wall. The board, which can be written on both sides, measures **1.10 x 1.92 m** and weighs only **8 kg**.

The cork edge is very soft to the touch, protects the board and its surroundings and is also very stylish.

The BigBoard is **compatible with all accessories** as the spaceWall and the spaceMount.

Measurements	1,10 x 1,92 m Weight: 8 kg
Material	Premium Whiteboardfinish, cork-frame, space3000 lightweight design
List Price	899 €

# WildBoard

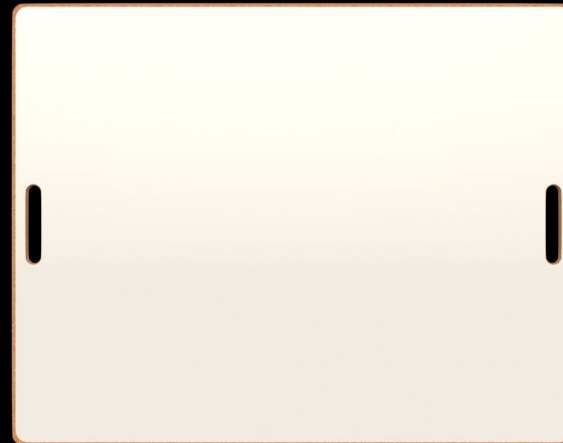

The WildBoard enables your creativity to flow in any location.

It's composed of two parts: The **modular frame and the portable**

**whiteboard**. The whiteboard can be locked into the frame and used from both sides. The **wheels allow easy movement** across your office.

The legs can be dismantled and stowed away with a few movements and without any tools. The frame can also be used for the BigBoard.

The WildBoard offers enough space for creative ideas and **is with its 6 kg the lightest design whiteboard on the market**. The removable board measures **1.10 x 1.40 m**. Locked in the frame it has a **total height of 1.92 m** and a total **weight of 12 kg**.

Measurements	Height: 80 cm Weight: 7,4 kg
Material	Premium Whiteboardfinish, cork-frame, space3000 lightweight design
List Price	499 €

# spaceMount

All space3000 whiteboards can be locked into the frame and be used from both sides.

The four **wheels allow easy movement** across your office.

The legs can be dismantled and stowed away with a few movements and without any tools.

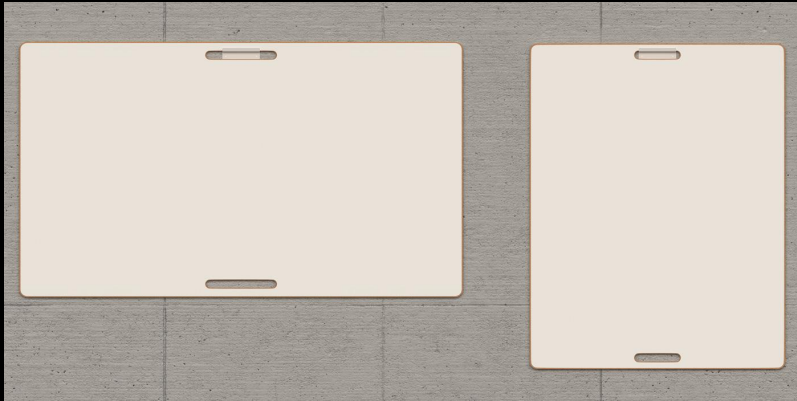

Measurements	1,10 x 1,40 m Weight: 6 kg
Material	laminated wood, powder coated steel
List Price	499 €

# Accessories

We currently offer two practical accessories. Our minimalist wall mount allows you to use WildBoard and BigBoard on one wall. The flipchart mount brings the traditional flipchart paper on our boards.

## spaceWall - Wallmount for all Boards

Meas.	16,0 x 2,1 cm
Material	Powder coated steel
List Price	69 €

## spaceFlip - FlipChart Mount

Material	Powder coated Steel
List Price	pair of two 29 €

# Material & Production

We are the **only manufacturer to use the natural material cork**. It provides a warm look, a very pleasant feel and protects the boards.

The **whiteboardfinish** was developed by a European brand manufacturer and **ensures a long durability**. In the core we use a self-developed ultra-light sandwich material, which for the first time allows a **very low weight and at the same time a high stability**.

**Our products are manufactured under fair conditions in Berlin factories.** We are counting on decades of experience, attention to detail and sustainable action. Wherever possible, our products are delivered with electric cars.

We are constantly providing a safe and healthy working environment and are operating in an environmentally responsible and efficient manner.

**With agile methods for agile methods.** Made in Berlin.
